

MISSION

- We provide quality skilled home health and personal care services to people in their home promoting self sufficiency and independence regardless of their financial status.

VISION

- To be recognized as the provider of choice for health and personal services in the home.
- To be recognized as the employer of choice in home healthcare and personal services.
- To lead in community home healthcare outcomes. This will be accomplished by postponing or preventing institutionalization, facilitating earlier hospital discharge and encouraging preventive and health promotion practices. Leading edge services in response to the current and predicted needs of the community will be continuously improved.
- To promote broad awareness by patients, referring sources and donors of the critical need for philanthropic support for the viability of our mission. The patient's right to make home healthcare decisions and the benefits of home healthcare will be pursued by educating professionals and the general community in the appropriate use of home care services, as well as the limitations under which these services are provided.
